SIMPLY PUT ON COMPRESSION STOCKINGS

1

Lay the compression stocking in the stirrup with the toe of the stocking facing forwards. Turn the upper border of the stocking inside out and over the frame

2

Slide the stocking down over the stirrup until the heel appears at the edge of the stirrup

3

Now place the medi Butler on the floor. Slip your foot, toes first, into the toe of the stocking. It is recommended that you lean against something firm (table, wall) for stabilisation

4

Now step into the rigid stand. Please check that the toe and the heel are correctly positioned

5

By alternately pulling and releasing the two handles you can now slide the stocking up towards your knee

6

When the stocking is just below the knee tilt the medi butler slightly backwards and remove it from the stocking

7

To finish, smooth the compression stocking upwards evenly. Please make sure you ease the stocking up bit by bit without gathering it up or pulling on the top

SEMIPERMEABILITY OF SURESKIN® II

The special and advanced hydrocolloid formulation of **SureSk'n®II** provides:

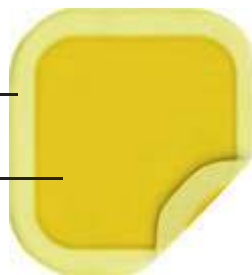

- Impermeability to liquids and bacteria, with lower risk of infection.
- Permeability to gases (O₂ and CO₂) and water vapor.

Structure and composition

OUTER LAYER: Semipermeable polyurethane film that allows circulation of O₂, CO₂ and water vapor, while excluding germs and water.

HYDROCOLLOID: Sodium carboxymethylcellulose (CMC).

SureSk'n® II BORDER

SureSk'n® II STANDARD

contains a thin foam under the polyurethane film.

SureSk'n® II THIN

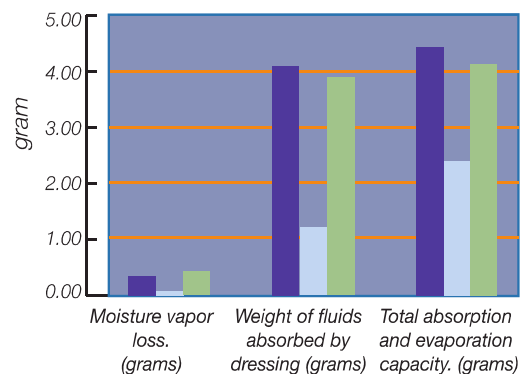

composition is identical, but the dressing is thinner.
